Reissue Applications

This application is objected to under 37 CFR 1.172(a) as the assignee has not established its ownership interest in the patent for which reissue is being requested. An assignee must establish its ownership interest in order to support the consent to a reissue application required by 37 CFR 1.172(a). The assignee's ownership interest is established by:

(a) filing in the reissue application evidence of a chain of title from the original owner to the assignee, or

(b) specifying in the record of the reissue application where such evidence is recorded in the Office (e.g., reel and frame number, etc.).

The submission with respect to (a) and (b) to establish ownership must be signed by a party authorized to act on behalf of the assignee. See MPEP § 1410.01.

An appropriate paper satisfying the requirements of 37 CFR 3.73 must be submitted in reply to this Office action.

The US Patent & trademark Office shows in their records that this application contains in total two assignments. The first assignment is Reel/frame number: 013669/0543 that shows the Oath filed on 04/10/02. However, the Oath to the second assignment with Reel/frame number: 015635/0232 is not in the document. The 3.73 (b) document must be signed by a party authorized to act on behalf of the assignee.

Oath/Declaration

Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 5,865,846 is or was

Art Unit: 3738

involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely apprise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.

The reissue oath/declaration filed with this application is defective because it fails to contain a statement that all errors which are being corrected in the reissue application up to the time of filing of the oath/declaration arose without any deceptive intention on the part of the applicant. See 37 CFR 1.175 and MPEP § 1414.

In accordance with 37 CFR 1.175(b)(1), a supplemental reissue oath/declaration under 37 CFR 1.175(b)(1) must be received before this reissue application can be allowed.

Claims 1-3, 12, 14 and 36-45 are rejected as being based upon a defective reissue oath under 35 U.S.C. 251. See 37 CFR 1.175. The nature of the defect is set forth above.

Receipt of an appropriate supplemental oath/declaration under 37 CFR 1.175(b)(1) will overcome this rejection under 35 U.S.C. 251. An example of acceptable language to be used in the supplemental oath/declaration is as follows:

“Every error in the patent which was corrected in the present reissue application, and is not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicant.”

See MPEP § 1414.01.

Response to Arguments

Applicant's arguments filed 03/29/07 have been fully considered but they are not persuasive.

Ownership Interest

The Applicant's argument regarding the Ownership Interest have been given weight, however, the Examiner maintained the rejection.

The Applicant's representative has not clearly disclose in the Consent of Assignee; Statement of Non-Assignment, specifically, the consent of assignment disclosing that the assignee (s) own an undivided interest in said original patent and does not disclose the date of the patent issued (see attachment of PTO/SB/53 form).

Additionally, the Examiner was unable to find, in the Statement under 37 CFR 3.73 (b), the chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee (see attachment of PTO/SB/96).

Oath/Declaration

The Applicant's representative traverse the rejection because the Reissue Declaration submitted on February 02, 2001 at paragraph 16 appears to comply with the requirements of 37 CFR 1.175 and MPEP 1414.

The Examiner disagrees with the Applicant's point of view because a supplemental reissue oath/declaration must be filed to correct defects or errors in the reissue after the filling of the application and the original reissue oath or declaration in order to state that every error which was corrected in the reissue application not covered by the prior oath/declaration submitted in the

Art Unit: 3738

application arose without any deceptive intention on the part of the applicant (see MPEP 1414.01).

Additionally, the original Oath, erroneously mentions in paragraph 19, that is material to the examination of this application... and it should be "it is material to patentability..." Corrections are required.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
